BLOOD SPILL

Inform Admin about the
BIO HAZARD SPILL(BLOOD SPILL).

Close off the Spill area by keeping
a caution board "Bio Hazard Spill" Do not Enter

Locate the “Spill Kit”

Wear Disposable Gloves, Face mask, Apron, Protective Glass etc., as applicable

Collect broken glasses or other sharps if present by using forceps & Discard it Carefully in a separate container

Use disposable paper to absorb as much of the body fluids as possible

Saturate the area with 1% of Sodium Hypochlorite Solution
(2:8 dilution 2 part of solution with 8 part of water)

Use paper/cloth towel to soak up and remove all Spilled blood spill and sodium hypochlorite solution. Push the towel from the edge of the spill into the center.

Discard soaked paper or towel in a yellow plastic bag and leave the area clean and dry.

Remove the Gloves, Apron, Mask and Discard it in the Yellow Plastic Bag.

Tag the yellow bag tight and discard in the yellow BMW container.

Wash Hands Carefully with the Soap and water
And dry Thoroughly.

Record the Incident in the Incident register book
If a Specimen lost.

THANK YOU
